Summary

Backend Software Engineer with 3+ years of experience building APIs and services for clients in banking, hospitality, telecom and travel. Built backends in Node.js/TypeScript on client projects, and now in PHP/Laravel on Hubby eSIM's live product, where I also take partners live and work with them directly. Quick to adapt to new stacks and domains, with a Python deep learning background from my published research.

Skills

- **Languages:** TypeScript, JavaScript, Python, PHP, SQL
- **Backend:** Node.js, NestJS, LoopBack 4, Laravel, REST APIs, OpenAPI, Webhooks, Queues
- **Databases:** PostgreSQL, Redis, Firestore, TypeORM, Eloquent ORM
- **Cloud & Tools:** Firebase (Cloud Functions), Laravel Cloud, Docker, Git, CI pipelines, Pest, PHPStan, Stripe

Experience

Backend Developer — Hubby eSIM, Remote May 2026 – Present

- Rebuilding Hubby's live eSIM backend, moving it from Node.js/TypeScript on Firebase to PHP/Laravel and PostgreSQL
- Build partner REST APIs (OpenAPI), booking flows and webhooks for travel brands such as Super.com, DERTOUR, Migros Ferien and SAS EuroBonus, compatible with the legacy API
- Built Stripe payments (top-ups, refunds, per-country VAT), queued background jobs and CRM and analytics events
- Lead partner go-lives: analysing their setup, migrating their data and API keys and running the cutover
- Join partner meetings as the backend contact and turn partner and product requirements into shipped features
- Ran a multi-tenancy security audit and found an access-control flaw in the legacy Firestore rules
- Own production incidents from root cause to hotfix and data recovery, with tested code (Pest, PHPStan)

Software Engineer — Banzae, Skopje, North Macedonia Sep 2023 – May 2026

- Designed and built backend APIs in Node.js/TypeScript with NestJS and LoopBack 4 on PostgreSQL (TypeORM)
- Built full-stack features with React, Next.js, Tailwind CSS and Material UI across multiple production systems
- Part of a dedicated team working with a Polish technology company on enterprise contact-center software

Projects

Speech Analytics Platform

- Built data visualizations of speech transcription and analytics data for one of the largest banks in Poland

Contact Center System

- Implemented platform configuration features for an enterprise contact-center system used across Europe

IPTV Platform for Hotel TV Systems

- Built Node.js backend services and APIs for an IPTV platform used on smart TVs in hotels across Europe

Fitness Coaching Platform

- Built backend features for a SaaS platform where coaches manage clients, training and nutrition plans

Education

Bachelor of Computer Science and Engineering

Faculty of Computer Science and Engineering, Ss. Cyril and Methodius University – Skopje, North Macedonia

- Thesis: *Techniques for Implementing Quantitative EEG and Detection of Emotional States*, published as *Techniques for EEG-Based Detection of ADHD Using Deep Learning*
- Built a Python pipeline for EEG preprocessing (band-pass filtering, windowing, normalization) and classification
- Compared a CNN (EEGNet) with a fine-tuned transformer (NeuroGPT) using leave-one-subject-out validation
